EU Citizenship

Data Analyst & BI Specialist with 4 years of experience building advanced Power BI dashboards, SQL pipelines, and analytical solutions that drive data-driven decisions across energy, healthcare, and commercial environments. Proven track record translating complex datasets into clear executive reporting, loyalty program analytics, and customer behaviour insights. Strong communicator able to work directly with business stakeholders and C-level audiences.

Technical Skills

Programming	SQL (Advanced) · Power BI (Advanced) · Python (Pandas, NumPy, Matplotlib, Seaborn)
ML / Stats	Customer Segmentation · Churn Analysis · Loyalty Analytics · KPI Design · Statistical Analysis · A/B Testing
BI & Tools	Tableau · Alteryx · DAX · Power Query · Salesforce · SAP · Scrum/Agile
Data & ETL	ETL Pipeline Design · AWS Redshift · Azure · Power Automate · Databricks
Languages	Spanish (Native) · English (Fluent, C1) · French (Proficient, B2)

Experience

NTT DATA

Feb 2025 – Present

Data Scientist

Madrid, Spain

- Designed and maintained advanced Power BI dashboards for Endesa's B2C loyalty program (3.5M+ customers) — communicating churn risk scores, retention KPIs, and campaign performance to C-level stakeholders across the energy sector.
- Engineered automated ETL pipelines in Python and SQL on AWS Redshift processing millions of customer behaviour rows — building the data foundation for loyalty analytics, segmentation models, and near real-time customer scoring.
- Analysed churn risk across Endesa's B2C loyalty program using SQL and Power BI — identified high-risk customer segments, designed retention dashboards for campaign teams, and tracked ~30,000 prevented churns through targeted intervention campaigns.
- Led customer segmentation project (K-Means) on 36,000+ real survey records — produced 10 actionable visitor profiles and delivered findings as Power BI dashboards and executive presentations for a public sector client in Tenerife.
- Deployed conversational RAG system for Sistema Andaluz de Salud on Azure (AI Search, Azure OpenAI, Blob Storage) — enabling non-technical staff to access institutional data via natural language, reducing manual reporting effort.

Align Technology

May 2024 – Feb 2025

Business Intelligence Analyst

Madrid, Spain

- Built and deployed a predictive lead-scoring model in Python to identify high-potential, high-LTV users for a new product launch, increasing conversion rates by 18%.
- Acted as primary liaison between EMEA business stakeholders and data teams — translating commercial requirements into analytical dashboards and automated reporting workflows.
- Designed complex data models and standardized semantic layers, building a robust analytics suite that empowered teams to self-serve insights and contributed to a 25% increase in product adoption.

TBM Consulting

Oct 2022 – Oct 2024

Data Analyst

Madrid, Spain

- Operated in a highly ambiguous environment to build structure where none existed, designing a centralized dimensional data model in SQL that established a single source of truth and improved operational efficiency by 15%.
- Automated data ingestion and deployed analytical scripts using Python and AWS, replacing legacy manual processes and reducing ETL processing latency by 40%.
- Led deep-dives into manufacturing logs using Python (Pandas) to uncover root causes of bottlenecks, quantifying opportunities that translated into a €324,000 profit gain for the client.

Celonis

May 2022 – Sept 2022

Solution Engineer Intern

Madrid, Spain

Education

University of Navarra

Executive Master in Big Data Science

May 2024

Madrid, Spain

Stakeholder Management, SQL, Machine Learning, Deep Learning, Project Management, Azure, Statistics

EY – Thesis Project: Developing a machine learning model for predicting economic recessions in the United States.

University of Navarra

Degree in Economics + Leadership & Governance

May 2021

Pamplona, Spain

Semesters Abroad: Université du Québec à Montréal (Fall 2018) · IESEG School of Management, Paris (Fall 2019)

Certifications: Alteryx Designer Core · Scrum / Agile
